

Missouri Department of Natural Resources
Public Notice For Regulatory Impact Report
In Preparation of an Amendment to
10 CSR 20-8.110 Engineering – Reports, Plans and Specifications
May 17, 2010 – July 16, 2010

The Department has approved the public notice of the Regulatory Impact Report (RIR) for a draft amendment that will provide standards for engineering reports, facility plans, and construction drawings and specifications.

Amending 10 CSR 20-8.110 Engineering – Reports, Plans and Specifications in the upcoming rulemaking will allow the department to update basic requirements for project engineering reports, plans, specifications and other technical documents that are required for all construction permits. Although this rule is an administrative rule and does not establish *environmental* standards or conditions requiring an RIR, the document was drafted to provide regulatory impact information to the public. The RIR documents the environmental benefits and economic costs associated with the upcoming rulemaking.

The department is providing a sixty (60) day comment period, from May 17, 2010 through July 16, 2010 in which the public may review and comment on the RIR. A public comment period on the proposed amendment will be provided later in the rulemaking process.

The RIR can be accessed on the web at www.dnr.mo.gov/env/wpp/rules/wpp-rule-dev.htm. RIR copies may be requested by calling (573) 751-6569, or writing to the Missouri Department of Natural Resources, Water Protection Program, P.O. Box 176, Jefferson City, MO 65102-0176, Attention Ms. Emily Lyon, or by e-mail at emily.lyon@dnr.mo.gov.

Written comments regarding the RIR will be accepted through 5:00 p.m. on Friday, July 16, 2010. Please address comments to Ms. Emily Lyon at the above mail or e-mail address, and include a name, address and phone number.
